## Q1 IN REVIEW: BRIC economies

Collective BRIC (Brazil, Russia, India, China) energy demand is expected to rise in the coming decades as the group's economies continue to grow, driven primarily by India and China, with BP projecting the group to account for over 40% of global primary energy consumption by 2035.

However, economic indicators such as gross domestic product (GDP) and the Purchasing Managers Index (PMI) have yet to suggest that the trend has begun at pace.
