## Slow growth in Q4 '14; LNG activity for the year up on 2013

?Total LNG supply in visual\_editor014 reached visual\_editor41.3 mt, up by 3.1 mt (1.3%) compared with visual\_editor013. Although it was the first significant increase since visual\_editor011, supply was still marginally below the level reached three years ago. The outcome was also lower than was expected at the beginning of visual\_editor014. Gas Strategies reviews LNG supply and demand in the fourth quarter of visual\_editor014, the year as a whole, and assesses the implications for visual\_editor015.
