Risky Business? How risk is managed in LNG projects – part 2

The recent precipitous fall in oil prices is a reminder of the huge cash flow risks that both buyer and seller may be taking on. Gas Strategies takes a look at what recent events have reminded us about the business risks associated with LNG projects, and considers how participants have found ways of apportioning risks amongst themselves. Following on from part one, this second article considers how participants divide up cost risk, volume risk, price risk, regulatory risk, and counterparty risk.
