# Iran's South Pars project phases 19-21 nearly complete

Iran's mammoth South Pars field project has reached at least 90% completion at phases 19-21, state energy news agency Shana reported this week.

The first 21 phases of the full 24-stage plan are scheduled to come online when the current Iranian calendar year ends in March 2017, bringing total output from South Pars to a new average of 18.7 Bcf/d (193.4 Bcm/year).
