Wartsila to build fifth power plant in Argentina

Wartsila has been contracted to build a fifth power plant in Argentina following a tender by power market operator CAMMESA, the latest of which a 92 MW gas-fired unit for energy firm Sullair Argentina expected to come online by mid-2017.

Since July, the Finnish company has been contracted to build a total of 382 MW of generation capacity in the South American state. Sullair Argentina emerged as winner of the CAMMESA tender and subsequently elected Wartsila to deliver the plant.
