FEATURE: Trumponomics – The regulatory crusade

On the campaign trail and now at the outset of what might be eight years in the Oval Office, Trump's economic vision has inspired a mix of hope and fear across the US.

In this fractious political landscape, one might ask whether any common ground remains between E&P companies looking to turn a profit from fossil fuels, states aiming to boost employment and create well-paid jobs and the increasingly popular environmental movement against the energy industry – and, especially, the drilling techniques that have unlocked oil and gas reserves unimaginable just ten years ago.
