Mozambique: Horn of plenty or LNG chimera?

The positive final investment decision on the Coral South floating LNG (FLNG) project at the start of June means that at last Mozambique can look forward to becoming an LNG exporter in the early 2020s. It is, however, a long-delayed and modest beginning considering the huge gas discoveries made in the offshore Rovuma Basin between 2010 and 2013 by two partnerships, one led by Anadarko and another by Eni. The big question now is how much more LNG development can be expected in Mozambique – and when?
