Chinese hydro shut-ins 'not likely to affect gas demand' – experts

Short term demand for gas-fired power generation is unlikely to change significantly in China despite the country shutting down more than 6 GW of hydro capacity following a period of heavy rainfall.

Operators have temporarily switched off two-thirds of capacity at the 18 GW Three Gorges plant and half of the 2.9 GW Gezhouba facility to minimise flooding risk on the Yangtze River and protect hydroelectric turbines.

The shut-ins coincided with ...
