# LNG ISO tanks – Interview: Louis Ravenet, CEO, Okra Energy

US-based Okra Energy is using a Silicon Valley startup approach to small-scale LNG, designing and building small modular cryogenic technology, while using ISO containers to create virtual pipelines to streamline the value chains involved in liquefaction, transport and storage of gas. In this interview, LNG Business Review talks to CEO Louis Ravenet about his company's growing presence in the Americas and why he believes ISO containers will play a key role in tapping stranded fields and creating the world's first true small-scale LNG exchange.
