[1]

US benchmark Henry Hub continued to fall on Wednesday, with the front-month price closing 1.1% lower to hit USD 2.46/MMBtu. The slump was attributed to lower demand from US Gulf coast LNG projects which are reducing operations ahead of Hurricane Laura making landfall.

On the other side of the pond, European gas prices continued to rally, with the front-month Dutch TTF and UK NBP settling 3.4% and 2.5% higher respectively. CME's JKM futures contract also continued to rally, closing 2% higher.

Oil prices were mixed, with Brent falling by 0.5% and WTI closing 0.1% higher.
