Global gas-to-liquids capacity to treble to 250,000 b/d by 2015

Global production of gas-to-liquids (GTL) products is on track to reach 250,000 b/d by 2015, as Shell's Pearl project in Qatar ramps up to full production and Nigeria's Escravos project comes on stream in 2013. Growth beyond 2015 will depend on new projects reaching final investment decision (FID), with several proposed projects hoping to pass that milestone over the coming two to three years.
