Williams and Dominion to deliver Rockies gas to the US east coast

Williams and Dominion Resources will form a joint venture to develop a 240-mile pipeline to deliver up to 1 Bcf/d of natural gas produced in the Rockies and Appalachian basins to markets in the Eastern and Mid-Atlantic region of the US. When built the Keystone Connector will bring gas from the Marcellus shale play in the Appalachian region, one of the largest reserves of gas in the US, to market.
