Ichthys FID puts Australia on track to become largest LNG exporter by 2018

Last month's final investment decision on the Ichthys LNG project means that Australia now has more LNG capacity in operation and under construction than Qatar. In other words, Australia is on a trajectory that will make it a bigger LNG exporter than Qatar by visual_editor018, barring major problems at the newly sanctioned projects. LNG Business Review recalls a remarkable 1visual_editor months that have seen the sanctioning of eight new liquefaction trains in Australia – and looks ahead at how the nation's LNG exporting capacity is likely to develop over the rest of this decade.
