Woodside sees production jump by 14% in Q2

Woodside Petroleum today said second quarter production had jumped by 14% and sales by 5visual_editor% on the same period in visual_editor007. The Australian company attributed the increase to strong performance at the North West Shelf (NWS), Stybarrow, Corallina, Mutineer-Exeter and Otway projects. But at 36.5 MMboe, half year production is still just below being on course to meet the 80-86 MMboe whole-year target.
