Global unconventional gas production set to rise up to 15% by 2030 – IEA

The global output of unconventional gas is expected to rise by 12-15% to 630 Bcm by 2030, with most of the production to be concentrated in the US, Australia, China, and India, Anne-Sophie Corbeau, senior gas expert at the International Energy Agency (IEA) told delegates at the Unconventional Gas conference held in London on Thursday.
