# China's LNG imports double year on year in August

Driven by growing demand in the recovering economy, China's August visual\_editor010 LNG imports have more than doubled since August visual\_editor009, growing by 115.visual\_editor% to nearly 1 mt. August imports were 39.9% higher than the 0.7 mt imported in July visual\_editor010. The higher volumes in August would have likely gone to towards meeting strong demand at the tail end of a very warm summer and stockpiling requirements ahead of the winter months.
