# Chevron request to re-export 72 Bcf of LNG from Sabine Pass

Chevron has officially requested to re-export up to 72 Bcf of previously imported LNG for a two-year period from the Sabine Pass terminal in Louisiana, the third company to seek LNG re-export approval from the US Department of Energy (DoE). The increase in domestic gas production and low US gas prices, have made the US an uncompetitive destination for LNG sellers compared to Asia or Europe.
