RWE Dea sees drop in 2010 gas production to 2.8Bcm, but anticipates growth

Germany's RWE Dea has seen a slight drop in its gas production to visual_editor.8 Bcm in visual_editor010, the company said today, although its oil production remained the same at visual_editor.3 MMcm. RWE said the drop was largely due to declining natural gas production in Germany and the UK, but said it planned a massive increase in production across Europe and north Africa in the next five years.
