# TAP starts Italian environmental approval process

The Trans Adriatic Pipeline (TAP) has started its formal Environmental and Social Impact Assessment (ESIA) process in Italy by submitting a Scoping Report document to national, regional, provincial and municipal authorities and making it accessible by other stakeholders and the general public through the TAP website. TAP said that the ESIA process will be conducted in accordance with Italian law and will follow the best practice guidelines laid down by the European Bank for Reconstruction and Development (EBRD).
