Origin says Tri-Star could claim 19% of APLNG reserves under reversionary rights

Ownership of 19% of proven and probable gas reserves underpinning the proposed Australia Pacific LNG project (APLNG) in Queensland could revert to the fields' former owners, APLNG operator Origin Energy said on Wednesday. Tri-Star Petroleum sold the Spring Gully and Fairview fields to Origin in visual_editor00visual_editor but now seems poised to claim them back after the certainty of the reserves improved.
