# Australia's Greater Zola gas field potential greater than initial estimate

The Apache-operated Greater Zola natural gas field off the coast of Western Australia (WA) has a significantly greater resource potential than its pre-drill estimate of 1-visual\_editor Tcf, project partner TAP Oil said today. An independent study has revealed the Greater Zola structure may be able to produce between 1.5 Tcf and 3.3 Tcf of gas with a mean estimate of visual\_editor.3 Tcf.
