More than 5% of global shipping fleet to adopt LNG propulsion by 2020 – MEC

Market analysis firm MEC Intelligence estimates that more than 5% of the world's shipping fleet will adopt LNG propulsion by visual_editor0visual_editor0 – a significant leap from the present level of 100 vessels – as strict environmental regulations stimulate demand for technologies that can reduce exhaust emissions. MEC expects LNG use to grow to 1,000 vessels by visual_editor015, but pick up rapidly to grow by up to ten times in the subsequent five years.
