Eni sizes up further Angola potential

Eni chief executive Paolo Scaroni met with Angola's President José Eduardo dos Santos on Tuesday to discuss Eni's activities in the country, including recent oil and gas discoveries made in offshore block 15/06. The block contains the Lira gas and condensate find, which Scaroni called "a very good discovery". New resources could help feed a second train at the Angola LNG facility, in which Eni holds a 13.6% stake.
