# Anadarko further expands Mozambique resources on drilling success

US independent Anadarko said on Monday that gross recoverable gas resources at its Rovuma Basin block offshore Mozambique could range between 15 Tcf to over 30 Tcf, up from its 10 Tcf October estimate. Anadarko increased its estimate after success with its Barquentine-3 appraisal well, and said its planned two-train LNG plant in Mozambique could be expanded to up to six trains.
