TNK-BP commences offshore drilling on Lan Do field in Vietnam

TNK-BP announced on Thursday that it had spudded the Lan Do well, located 8 km east of Lan Tay Platform in Block 06.1, where the company is producing natural gas and condensate for power generation. In October last year, the Vietnamese Ministry of Investment and Trade granted TNK-BP a licence to operate Block 06.1 – Vietnam’s largest in gas producer containing the Lan Tay and Lan Do gas fields.
