# US receives only 19% of Trinidad and Tobago LNG exports in 2011

Continued weakness in the US natural gas market meant Trinidad and Tobago exported only 19% of its LNG exports to the US in 2011, sending the remaining 81% to better priced markets in South America, Europe and Asia. The US has been the main destination of choice for Trinidad and Tobago's LNG since the start of LNG production in 1999, with 89% of the country's exports shipped to the US in 2005.
