Freeport LNG enters liquefaction FEED agreement with Zachry and CB&I

Freeport LNG – which owns an LNG terminal in Freeport, Texas – said on Wednesday it had signed a Front-End Engineering and Design (FEED) contract with engineering companies Zachry Industrial and CB&I. The FEED is for three 4.4 mtpa liquefaction trains for an LNG export plant, located near the existing Freeport terminal. Freeport is one of a number of new US shale gas-fed export projects currently at various stages of development.
