## Mitsubishi buys Canadian assets

Mitsubishi Corporation has agreed to buy 40% of Encana's natural gas development project in the Montney shale play in north-eastern British Columbia, western Canada, which has total estimated recoverable resources of more than 35 Tcf. The companies plan to invest more than CAD\$6 billion over the next five years to develop the project, which is expected to have more than 50 years of production life and reach production of more than 3 Bcf/d. Mitsubishi is already developing the Cordova Embayment project in British Columbia with plans to export LNG.
