Romanian gas field could start production from 2015

Romania's President Traian Basescu on Monday was quoted as saying that the offshore Domino-1 well, located in the Black Sea Neptun Block and jointly owned by OMV and Exxon Mobil, could start production in 2015-2017. Last month, OMV announced that production from the well could start towards the end of the decade at the earliest, after preliminary results indicated resources of between 1.5 and 3 Tcf.
