## Chesapeake to build \$900 million midstream complex

Chesapeake Midstream Development (CMD) has entered into a partnership with M3 Midstream - a midstream energy company that provides natural gas producers with services linking the wellhead to the market - and EV Energy Partners to develop the largest integrated midstream service complex in eastern Ohio, US. The complex will provide infrastructure to process natural gas and natural gas liquids (NGLs) in the liquids-rich Utica Shale play in eastern Ohio, with an initial capacity of 600 MMcf/d.
