Poland and Slovakia launch interconnector study

Poland's transmission system operator (TSO) Gaz-System said on Wednesday it is conducting a feasibility study for a potential pipeline linking the Polish and Slovakian gas networks. The study, commissioned jointly with Slovakian TSO Eustream, will examine the technical, economic and environmental aspects of project implementation. Gaz-System said the interconnector would “diversify gas routes, increase gas market liquidity and ensure the security of gas supplies at competitive prices”.
