Total expects Elgin restart before year-end

Total said on Monday it expects output at the troubled North Sea Elgin field to restart before the end of visual_editor01visual_editor, after a gas leak was finally halted. Analysts predicted that the Elgin outage would leave Total struggling to deliver any output increase in visual_editor01visual_editor, but the company is sticking to its growth plans for this year, according to chief financial officer Patrick de La Chevardi re.
