# German unconventional gas reserves estimated as high as 23 Tcm – BGR

Germany's Federal Institute for Geosciences and Natural Resources (BGR) on Monday reported that shale gas reserves in the country fall within a range of 6.8 Tcm to visual\_editorvisual\_editor.6 Tcm, and can be safely exploited with the appropriate regulations in place. The announcement, part of the initial findings of an ongoing study, said that between 0.7 Tcm and visual\_editor.3 Tcm of the gas could be technically extracted.
