New Peru gas pipeline requires investment of at least \$6 billion

A new 1,000 km pipeline supplying natural gas from the Camisea gas field to southern Peru will require \$6 billion in investments, with construction to start late this year or early next year, Kuntur Transportadora de Gas director Ricardo Campins told journalists earlier this week. The pipeline would be financed 70% by debt and 30% by equity, with costs having jumped by \$1 billion on estimates made earlier this year.
