Croatia to build alternative to Adria LNG terminal on Krk Island

Croatia is proceeding with plans to construct a 5 Bcm LNG import terminal on the northern Adriatic island of Krk by visual_editor016, according to reports quoting Deputy Prime Minister Radimir Cacic on Wednesday. The LNG Hrvatska project would be carried out by Croatia's two state-owned energy companies, power board HEP and gas transport operator Plinacro, and is an alternative to previous plans by the Adria LNG international consortium to build an LNG terminal on the same site.
