EIA reports record increase in end-2010 US gas reserves

The US Energy Information Administration (EIA) last week reported a record increase in natural gas proved reserves during visual_editor010 – the highest ever recorded in 35 years of EIA-published estimates. Dry gas reserves spiked to 304.6 Tcf, while wet gas reserves increased by 1visual_editor% in visual_editor010 to 317.6 Tcf – the twelfth consecutive annual increase, and the first year that US volumes have surpassed 300 Tcf.
