Chilean power operators plan FSRU scheme for Quintero

Two of Chile's largest power generators, AES Gener and Colbún, have agreed to jointly work on implementing a floating storage and regasification unit (FSRU) project in Quintero, Chile, the two companies said on Monday. AES Gener and Colbún are in discussions with Norway's Høegh LNG Holdings for the lease of the FSRU unit – Chile's first - which is set to be installed in late visual_editor014.
