Chevron could turn to spot market to sell Gorgon LNG volumes

Chevron's 2.4 mtpa of uncommitted equity volumes from its Gorgon LNG project on Barrow Island could wind up being sold on the spot market, the company has admitted, saying that although it is looking to lock down further long term contracts, "we are value driven so we need to get a price that we think is appropriate", as it eyes plans to introduce first gas to Train 1 of the plant this year.
