British Columbia: the end of the hydro-powered LNG ideal?

The western Canadian province of British Columbia is eager to exploit its potential for LNG export – and to become the first proponent of LNG production powered almost completely by renewable energy. But its green ambitions fell by the wayside this summer, when its Premier Christy Clark hastily rewrote the Clean Energy Act to allow LNG exporters to power their plants the conventional way. Why has BC backed off hydro-powered LNG? LNG Business Review investigates.
