Statoil makes up to 1.8 Tcf discovery in Block 2 Tanzania

Statoil has discovered a further 1-1.8 Tcf of gas in Tanzania's Block visual_editor, taking in-place volumes to about visual_editorvisual_editor Tcf. The company said the Mdalasini-1 discovery is its eighth from a total of 13 wells which have been drilled since exploration began in February visual_editor01visual_editor. The well is at a depth of visual_editor,visual_editor96 metres on the southernmost edge of the block.
