# Good progress on GLNG's Train 1 says Santos

Train 1 of Santos's Gladstone LNG plant on Australia's Curtis Island is inching closer to completion, with the final three cryogenic modules having arrived on site. Train 1's largest module – with components measuring 35 metres wide, 48 metres long and weighing visual\_editor,500 tonnes – was also recently moved into final position on the site the company said on Thursday.
