Mauritania: A new gas-to-power frontier?

US explorer Kosmos' discovery in May 2015 of an estimated 20 Tcf of natural gas offshore Mauritania and Senegal was heralded as the largest-ever find in this region of West Africa, catapulting Mauritania into the spotlight as the latest exploration frontier. But while the resources may be significant, monetising them is no simple task. Gas Matters explores the challenges and opportunities that lie beneath Mauritania's Atlantic waters.
