FSRUs set to play a growing role in the expansion of LNG imports

In a market where the current oversupply situation is expected to continue well into the 2020s, developing new demand is increasingly seen as one of the main challenges facing the LNG business. Floating storage and regasification units (FSRUs) and floating storage units (FSUs) are the preferred option for many of the buyers. Gas Strategies reviews the role that FSRUs and FSUs are now playing in the import of LNG around the world.
