Leviathan drilling to kick off in first quarter 2017

Drilling will commence on an appraisal and production well at the 22 Tcf Leviathan field in offshore Israel in the first quarter of next year, project partner Delek Group has said.

Field operator Noble Energy will carry out the drilling at the Leviathan 5 area using the 'Atwood Advantage' vessel. The rig that will drill the well is currently creating a well at Israel's sole producing gas field, Tamar.
