# FEATURE: Beyond Energiewende – An existential challenge for the German gas industry

In late October 2016, ten German gas industry associations published a two-page letter with the title:  
“The gas industry’s plea for the Climate Protection Plan 2050: Decarbonisation with gas. Gas can green!”

Organised by industry association BDEW, the core sentence of the plea was: “Gas is the only fossil fuel flexible enough to not only partner with renewable energy but go green itself”.
