Hyundai to build four LNG-fuelled oil tankers

South Korean shipbuilder Hyundai Samho Heavy Industries (HSHI) has won an order to build four LNG-fuelled oil tankers for Russian state-owned shipper Sovcomflot.

The 114,000 deadweight tonnage (DWT) aframax tankers – which measure 250 metres in length, 44 metres in width and 21 metres in height and are chartered to Shell – are scheduled to be delivered from the third quarter of 2018.
