# Iran fired up by South Pars 20 gas recovery, oil exports

The National Iranian Oil Company started gas recovery from phase 20 of the “supergiant” South Pars gas field (SP20) on Sunday, Iranian state media reported over the weekend.

SP20 gas and condensate recovery started at 25 MMcm/d and 40,000 barrels/day respectively, local media said, and will be progressively ramped up over the coming 12 months.
