Australia's gas industry outlines enduring role for gas

Australia's gas industry has a long-term role in a zero-carbon world (out to 2050 and beyond), not just as a bridging fuel in the country's transition to a decarbonised economy, according to a strategy paper delivered in Canberra last week.

Gas Vision 2050, a report by five key groups representing more than 500 companies in Australia's gas industry, highlights an alternative to a future of decline for the gas industry.
