Tellurian submits FERC application to build Driftwood LNG plant

Tellurian has hit another milestone after applying with the US's Federal Energy Regulatory Commission (FERC) to site and construct its proposed 26 mtpa Driftwood LNG plant in Louisiana, just over a year since the company was formed.

The application was submitted to FERC on Friday. Tellurian is looking to construct and operate the LNG facility, as well as a 96-mile pipeline connecting the plant to interstate gas pipelines that will provide it with 4 Bcf/day of feed gas.
