Gazprom starts building TurkStream

Gazprom has kicked off the construction of the 910 km offshore section of the 31.5 Bcm TurkStream pipeline in the Black Sea near the Russian coast, the company said in a statement on Sunday.

Audacia, a vessel owned by Allseas – construction contractor for the both of the 15.75 Bcm TurkStream offshore trunks – will lay the pipes and pull them through microtunnels. A second vessel, Pioneering Spirit, will carry out pipeline construction works in the deep-water area.
